

## To Whom It May Concern

I am very pleased to recommend Mr. Hasan Helbawi for admission to your university program. Knowing him for many years I have watched this young man develop both academically and personally into a mature individual ready in every way for his postgraduate years.

Mr. Helbawi is a motivated person. His grades have been above average in all of his courses. He has consistently shown such a strong desire to learn subjects related to Information Systems and Software Engineering fields that I simply could not turn down his request for recommendation.

I have met Mr. Helbawi first in my Parallel Processing and Compiler Design courses during years 2013-2014. Compared to the class average, he performed well. Mr. Helbawi has completed his his 4<sup>th</sup> year project under my supervision. His project aimed to develop a mobile application for Taxi management in a crowded city like Damascus. As a supervisor of his project, I have noticed that Mr. Helbawi did good progress and he was aware about the importance of the results of his project.

Mr. Helbawi has the ability to produce good results in a wide variety of areas. Additionally, he represented our faculty three times in ACM programming competitions at the level of Damascus University.

I believe Mr. Helbawi is destined to be a good researcher, and therefore is an excellent candidate for your university. I highly recommend that you consider his application.

Please feel free to contact me, if you need any further information.

Sincerely,

Salah DOWAJI

Associate Professor

Dean of Information Technology Engineering Faculty

DAMASCUS UNIVERSITY  
Faculty of Information Technology Engineering

## Recommendation letter

Mr. Hasan Helbawi joined the faculty in 2010 and got his degree in 2015. He followed up all the courses of the curriculum in his college, and studied in Information Systems and Software Engineering major since the fourth year.

He was able to complete all courses and projects successfully and got high scores, which participated in his overall assessment.

I knew Mr. Hasan Helbawi when he followed up my courses (Data-Base I, Data-Base II and Information System Engineering), he proved to be a serious, clever and hardworking student.

The opportunity of postgraduate studies of students similar to Mr. Hasan Helbawi seems to be a good chance to acquire enough experts in IT to participate in the development of this sector in Syria.

I believe that Mr. Hasan Helbawi has enough qualifications and capabilities to follow-up higher education programs and to carry out high level academic and professional activities, so I recommend him to be accepted in postgraduate programs.

Please feel at ease to contact me with relevance to this letter.

Sincerely,

Dr. Madlin ABOUD
